Provision of information

If a local authority considers that a private water supply in its area is a potential danger to human health, it must promptly take appropriate steps to ensure that people likely to consume water from it:

a) are informed that the supply constitutes a potential danger to human health (and the local authority must serve a Regulation 18 Notice);

b) where possible, are informed of the nature of the potential danger; and

c) are given advice to allow them to minimise any potential danger.
